**The Technology
Behind The Transaction**

Mag-Tek's MICR check and card readers bring unprecedented ease, efficiency, and security to the retail counter. Thousands of retailers worldwide are reaping the benefits, moving customers quickly through checkout lines and verifying checks and magnetic stripe cards instantly at the point of sale while reducing fraudulent check acceptance. No delays. No mistakes due to manual character entry.

Easy

Reading of checks, credit and debit cards, and driver's licenses using Mag-Tek MICR readers is automatic and foolproof. There are no alignment or placement subtleties to introduce human error.

Accurate

Mag-Tek MICR readers handle checks in real-world conditions with the highest level of accuracy. You can be confident in the accuracy of the data read, and in decisions to accept or reject checks and credit cards. The ability to read driver's licenses affords extra protection by verifying customer identity.

Fast

Read a check, magnetic stripe card, or driver's license instantaneously, transferring information to the host system. Your customers will appreciate the good service and fast checkout. You'll realize benefits to the bottom line, accepting checks with confidence and ease (with appropriate host processing).

Durable

Mag-Tek MICR readers stand up through years of daily use at checkout, reading every check as accurately as the first. Proven in use, our MICR readers are in service today with major U.S. retailers, reading millions of checks daily and billions annually.

For more information on Mag-Tek MICR readers, contact your Mag-Tek Representative or call Mag-Tek directly at 1-888-624-8350.

Check Reading & Imaging

Mini MICR
Mini MICR with MSR
